

Abrasives

Cutting discs for metal and stone

All discs comply with the relevant regulations, have a high specific cutting capacity and guarantee a maximum of safety.

- manufactured according to EN 12413
- complies to oSa regulations
- of course: Made in Germany

perfect line

The best-seller with an excellent price/performance ratio. It has proven itself a million times in the hands of craftsmen and semi-professionals.

special line

The special line for craftsmen and industrial applications. Due to the fact that different materials impose different demands, DRONCO produces discs especially matching the respective material. Special types of corundum and bonds are combined to suit the task in hand. This optimises performance, extends service life, increases efficiency and reduces cutting time.
